

Proud Clients

We remodeled this whole house in Brookville.

We have a very good reputation with our clients. We make sure that the family is comfort-

able with their new home and we don't feel that our job is complete until the family feels satisfied with our work. We also create safe work environments for offices and the job isn't done until we feel that the company feels comfortable in their own work environment.

Creating a comfortable home for all

{ Tel: (631)291-1443 }

About Our Company

Our architecture company was established in 1993. We specialize in residential home design. We also do commercial interior design for medical and office spaces.

We have many years of experience and we have a good reputation for creating a comfortable environment for the clients.

Residential

We create an environment that the clients will love. Depending on what the client wants, we can do a renovation or completely customize their home to something different. Families will love the outcome of our jobs and enjoy their new home for many years.

Commercial

We design the interior to the office spaces to the companies needs. We create a good and safe working environment for you and your staff. We will create a perfect and professional working area for your company.

We recreated this whole backyard in Roslyn Estates.

We take our time with all of our projects to make sure they are fully complete and our clients are completely satisfied with our job. We always get back to our clients right when they call us for a job but we might be busy with another job at the time but the clients will be added on a list and we will do our best to get to the job as soon as possible.
