## Our First House

even recognize it at first.

Now from time to time they call us to do small jobs on their house and they always recommend us to people that want to remodel their home. I always thank this family to getting our name out there. If it wasn't for them, I don't know where our company would be today.

We took our time on this house because we wanted it to be perfect and we wanted the family to feel comfortable living in it. They said that this is their favorite home and they would never want to move because of the amazing job my company did. I will always be proud of this house and now we are more experienced and even more creative in ways to remodel any home or office.

When we first started this company, we had a hard time getting our name out at first. Than my friend of mine mentioned my name to a family member and they wanted to remodel the whole outside of their house. When I showed them the plans to what I thought would look good to their house they loved it.

The house took about 3 months to remodel. When the family finally saw the result they were amazed with the work we did to their home. They didn't

## Roslyn Estates

This is one of my favorite houses that we recreated. The family had no specific idea on what they wanted to change about their home so they

let me draw up a brand new house for them and they loved the idea of incorporating brick and wood on the outside of the house. This was a design

## Catch the Wave

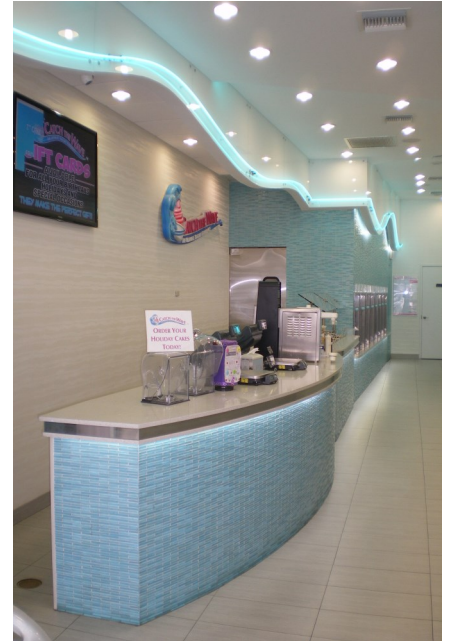

We turned a card store into a fun yogurt shop. We decorated the place with bright neon colors to give the place some excitement. We also added stools and televisions, so the customers can sit and enjoy while they are eating.

We rearranged the whole inside of the store. We had to first rip

apart everything because the ceiling was falling apart and there were stains all over the floor and walls. The shop was in a small shopping center, so in order to get customers' attention we made the yogurt shop have a bright color theme that would produce a good and fun vibe.

The shop is called

"Catch the Wave". I would recommend this yogurt shop for their various flavors and unlimited toppings. It is located in Plainview, New York.

## East Hills

For this house we recreated the families whole kitchen to fit the rest of the inside of their home. We repainted the walls, retiled the whole floor and put in new cabinets and added an island in the middle of the kitchen.

This families kitchen was falling apart and needed immediate assistance, so I was able to stop on a project I was working on and help this family out, so they wouldn't have to eat in a kitchen that was falling apart. They were very thankful that I was able to help them before the kitchen fell apart completely.

## Residential

We create an environment that the clients will love. Depending on what the client wants, we can do a renovation or completely customize their home to something different. Families will love the outcome of our jobs and enjoy their new home for many years. We are also very fair with our prices and are willing to work something out with the family on something that we can all agree on.

### [Professional]

We are very professional when it comes to our work for both residential and commercial. We have a good resume and we have yet to get a bad review.

## Commercial

We design the interior to the office spaces to the companies needs. We create a good and safe working environment for you and your staff. We will create a perfect and professional working area for your company.
