Explore with us a special place, one that will make both you and your child feel right at home

About Us

Cortland County Child Development Center is a child care service that focuses on providing convenient service to work with parents' schedules while also offering personal care, resembling care parents give at home. The professional staff is trained to work with children in a loving caring manner. The after school recreational program for school age children is a fun way for children to interact while their parents are at work and unable to attend to them in the afternoon hours. This program has built in popularity over the past few years and allows parents to be assured that their children are in a safe and secure environment.

Programs

The after school program offers a variety of activities for physical activity. This program also includes a healthy snack that will be approved by any parent. While enjoying all these amenities their program has to offer, your children will develop physical, emotional, intellectual, and social skills necessary to living a fulfilled life. In addition to the after school program, the Child Development Center offers a summer program that is available throughout the week during prime work hours. This program provides the same advantages as the after school program while including a full day's worth of meals and other fun activities such as amazing field trips!

Prices

So the only question left is how much could this possibly cost? Well this is another great feature to the Child Development Center. All of our programs are on a sliding scale, which means that how much you pay is dependent on your income. Their agency is partnered with an assisting agency called United Way. This allows their agency to provide great child care while also making sure anyone can afford it.

So please continue to explore this special program and come see how we can make both you and your child feel right at home. Please visit the Cortland County Development Center's website for more information.
